Thailand Introduces Digital Arrival Card (TDAC) to Replace TM6 Form

Starting 1 May 2025, Thailand's Immigration Bureau will require all foreign travelers entering by air, land, or sea to submit the Thailand Digital Arrival Card (TDAC) through online system instead of the TM6 paper form. This online system allows foreign travelers to provide entry and health declaration information in advance, ensuring faster immigration processing and improved data accuracy. Foreign travelers should submit their arrival card information 3 days in advance of arriving in Thailand, including the date of arrival. Foreign travelers can register individually or as a group and update their details before traveling via <http://tdac.immigration.go.th>. Required details include passport information, personal information, travel information, accommodation information, and health information.
